Prof. E. R. Caley
Department of Chemistry
Princeton University
Princeton, N. J.

Dear Prof. Caley:

At the request of Prof. Shirley H. Weber we made photographs of 12 Partheon coins that have been cleaned, and are herewith enclosing them. We changed the order a little from your layout as we wanted to get all four groups lit about the same. We have made dark, medium and light prints of each side and it is only a matter of cutting these out into strips and rearranging them on a piece of carboard to suit yourself. The engravers can do the rest. On looking over the photographs you might prefer to take one strip or one coin from one print and one from another. These photographs are remarkably clear and we hope they will show the texture as you wish.

Very truly yours,

HW:JG

Mr. Howland Wood, Curator,
The American Numismatic Society,
New York City,

Dear Mr. Wood, I am writing to thank you
for supplying the excellent photographs of the set of
of Parthian silver coins. They show the surface
condition and the general appearance of the cleaned
coins in a very satisfactory manner. Payment will be
forwarded in a few days by our purchasing agent in
the usual manner.

Sincerely yours,

Earle R. Caley

Mr. E. T. Newell
The American Numismatic Society
Broadway and 156th Street
New York City

Dear Mr. Newell:

This note of introduction will be presented by Drs. Helmut Schlunk and Kurt Weitzmann, who are engaged in a survey of the facilities in the cities in the vicinity of Princeton which would be available to scholars engaged in research in the fields of archaeology and the history of art at Princeton. These gentlemen are in America on a grant from the Institute of Advanced Study in Princeton for purposes which include the making of such a survey. Since the results of this survey would be of interest equally to the Institute of Advanced Study and the Department of Art and Archaeology at Princeton, I am taking the liberty of writing this note on behalf of both.

The time at the disposal of Drs. Schlunk and Weitzmann will permit only brief visits and it is hoped that the information thus derived can be supplemented by whatever printed literature is available, and by whatever oral information it will be possible and convenient for the persons in charge of each of the institutions to give. Whatever assistance can be accorded to them will be very highly appreciated both by the Institute of Advanced Study and by the Department of Art & Archaeology of Princeton University.

Very truly yours,

CKellory
